

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

Site Name:	Gary Coal Processing, L.P.
Applicant's Name:	Gary Coal Processing, L.P.
Site Location:	1 North Broadway, Truck Stop 216 Gary Lake County
VRP Site Number:	6971005
Project Manager:	Damon Ridley
Date Application Received:	October, 1997
Date Project Completed:	October, 1998
Project Duration:	1 year
Contaminant Group(s):	Lubricating Oil
Media Cleaned Up:	Surface Soil, Subsurface Soil
Cleanup Goals Achieved:	Tier II Nonresidential
Deed/Land Use Restrictions:	Nonresidential

Project Description: The facility began operations in February, 1993, on land leased from U.S. Steel Gary Works. The site is a pulverized coal injection processing facility. Part of the operations takes coal, pulverizes it, and injects it into blast furnaces owned and operated by U.S. Steel.

A Phase II Site Assessment was conducted at the site because of oil-stained soils along the railroad. The investigation discovered detectable levels of lubricating oil (Caprinus Oil). Remediation consisted of excavation of the tracks and soil.

Confirmatory samples were collected and verified soil levels below VRP's Tier II Nonresidential standards.
